Sushmitha Paniganti

Hyderabad, India

Portfolio +917013743244 panigantisushmitha@gmail.com LinkedIn GitHub LeetCode

Summary

Aspiring **Software Developer** skilled in **Python, SQL, MySQL, Django, HTML, CSS, and JavaScript**. Strong foundation in **OOP, DBMS, Operating Systems, and Computer Networks** with hands-on experience building Python, AI/ML, NLP, and Computer Vision projects. Seeking an entry-level **Software Developer/Python Developer** role.

Technical Skills

Programming: Python, SQL, JavaScript
Frameworks: Django
Web Technologies: HTML5, CSS3
Databases: MySQL
Libraries: NumPy, Pandas, Matplotlib
Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab
Core Concepts: OOP, Problem Solving, DBMS, Operating Systems, Computer Networks

Internship

Python Development Intern **Jul 2026 – Aug 2026**
QSkill (Remote)

- Developed Python applications including a **Student Performance Data Analysis** system, **Matrix Operations Tool**, and a **Sentiment Analysis Web Application** using **Pandas, NumPy, Matplotlib, Flask, and TextBlob**.
- Used **Git** and **GitHub** for version control while strengthening Python programming, debugging, data analysis, and problem-solving skills.

Projects

Product Management System — Python, MySQL

- Developed a **menu-driven Product Management System** using Python and MySQL for efficient product inventory management.
- Implemented **CRUD operations** with MySQL database integration for persistent storage and retrieval of product records.
- Used **Object-Oriented Programming (Classes & Objects)** and SQL queries to build a modular, maintainable, and database-driven application.

Fake Media Content Detection System — Python, NLP, Scikit-learn, Streamlit, SQLite

- Developed an **NLP-based classification system** to detect fake media content by analyzing textual data, addressing the challenge of identifying misleading information and improving content authenticity.
- Built an **interactive Streamlit web application** supporting text, file, and video inputs with real-time analysis and visualization.
- Implemented data preprocessing, feature extraction, and model evaluation, enabling accurate predictions with probability-based outputs and efficient content verification.

AI-Based Robbery Behavior Prediction System — Python, OpenCV, Machine Learning, CNN, YOLO

- Developed an **AI-based system** to detect suspicious or robbery-related behavior from indoor surveillance footage using activity pattern analysis.
- Applied **machine learning models (Logistic Regression, Random Forest)** and computer vision techniques (CNN, YOLO) for real-time behavior detection.
- Designed a **real-time alert mechanism** to identify potential threats early, reducing manual monitoring effort and improving security response efficiency.

Education

Malla Reddy Institute of Engineering and Technology **Hyderabad, Telangana**
Bachelor of Technology (B.Tech) in Computer Science Engineering, GPA: 8.62/10.0 *2022 - 2026*

Vasundhara Junior College For Girls **Hyderabad**
Intermediate Education, GPA: 8.85/10.0 *2020 - 2022*

Sri Vaishnavi High School **Hyderabad**
Secondary School Education, GPA: 10.0/10.0 *2020*

Certifications

- **Tata Group – GenAI Powered Data Analytics Job Simulation** – Forage (Jul 2026)
- **Python Full Stack Development (Ongoing)** – 10000Coders
- **Python Programming** – Simplilearn
- **Generative AI Workshop** – 10000Coders
- **Cambridge English Empower** – B2 Level

Extracurricular Activities

- Actively practicing **problem-solving** through coding platforms to strengthen analytical thinking and programming skills.
- Participated in **technical workshops** and seminars related to Machine Learning and Software Development.
- Collaborated with peers on academic projects, **enhancing teamwork, communication, and problem-solving abilities**.
